Report of Funded Projects

Past

2017-2018

Trends and disparities in de-adoption

NIA/T32-AG000186

Training fellow (\$31,364)

The major goals of the study are to examine temporal trends in de-adoption of clinically inappropriate care in the Medicare population and to determine whether these trends differ by race and ethnicity.

2018-2020 Understanding how physician cognitive biases affect the treatment of older adults with dementia
 NIA/F32 AG060650
 PI (\$219,959)
 The major goal of the study is to use national electronic health record data to examine how cognitive biases among physicians may lead them to pay less attention to important clinical data in the medical record when caring for patients with dementia.
